

NEW MACHINERY GOES TO PACIFIC

A load of heavy machinery was shipped to the Canyon this week for the Pacific mill. The pieces of machinery weighed from 4,000 to 10,000 pounds each and some of the pieces required several teams to get up the steep grades to the mill. The pieces were the crushing parts used in pulverizing the ore to a fine state.

The machinery is now nearly all in the Canyon and placed in position. The mill is practically completed. The management says that all the pieces are in readiness to start operating as the power line is gotten from Snake Creek.

The question of transporting the ore from the mine to the mill will be a problem which will probably be solved by building a tram one mile long on the west side of the canyon. The company has recently been building a lot of new buildings on the Pacific Flat and the Dutchman Flat and is now getting things in shape for the winter campaign. Effort will be made to keep the open all winter. This will be done with the constant traffic will be going on this year. It is probable that at the end of winter sleds will be the convenient.

STATE MINERS ARE ENTHUSIASTIC

Men who came down from the State this week report the face of the tunnel entering some most interesting territory where the management expects to cut the vein that most promising in the work. The brown lime that the ore is now coming in and the next thirty feet some interesting disclosures are being counted. One of the miner's faith in the property he left his last month's check with a local broker to a block of stock which he says is double in the near future. They are preparing to put in sufficient for a long winter campaign.

WITH PARK MINE BUILDS NEW HOME

South Park has just completed a cabin 15 by 32 feet with two rooms for the convenience of its men this winter. During the summer they have lived in tents. Preparations are being made to continue all winter in the tunnel near camp. Recently the men have been working in a tunnel on the east part of the company's domain. They are driving to cut a strong mineralized fissure at right angles. The face of the tunnel is near the objective point and will be as long as the weather permits.

ILLER EXPLORATION PREPARES FOR WINTER

Miller Exploration expects to the Pacific fissure by the end of the month according to J. C. Jensen, general manager of the leasing company who are driving the deep tunnel into the Pacific and Dutchman. Mr. Jensen is getting everything in shape for a winter campaign. He has recently completed a comfortable cabin for the miners use and put in a stock of supplies because the snows of winter impede the work.

He also makes the important arrangement that power drills will be in operation by the end of the month. The compressor plant has been done. It was at first intended to use an oil burning engine for power but the decision of the Utah Power & Light Co. to extend its line to the Pacific mine and change his plans in favor of the more convenient and cheaper power.

The face of the tunnel is now in 550 feet, and is still in the shale formation that was present when the tunnel was started. The

shale lies on top of the quartzite and the miners expect to cut the contact any time, though they have no means of knowing whether it will be found several hundred feet ahead yet. The management do not count on cutting the fissure till the tunnel is in about 1500 feet and figure on breaking about 250 feet per month.

MINERAL FLAT IN OLD TIME FORM

A Force of Miners Now Cleaning Out Old Workings Preparatory to an Active Campaign Through the Winter.

Manager J. C. Jensen was in town this week and reports affairs at the Mineral Flat rapidly rounding into form for a vigorous campaign of development at this property which a few years ago was creating state-wide interest. Prospecting will go on simultaneously in several sections of the mine. The main tunnel is now in over 2,100 feet. About 500 feet ahead is the gray soluble ore-bearing lime. The tunnel is expected to cut this bed where it is intersected by a strong ore bearing fissure.

Besides driving the deep tunnel straight ahead, men also will be started at a point about 1,500 feet from the portal to crosscut for what is known as the overthrust or Cardiff contact. The government surveys and the developments in Alta since the Mineral Flat was in operation have given information by which future development work can be done much more intelligently.

Some of the most promising showings formerly were in the old Brockbank tunnel. At a point about 1200 feet from the face of the main tunnel a crosscut will also be started to the west to explore the territory lying below the Brockbank tunnel, which will be opened by a raise driven up 187 feet from the crosscut.

FLOOD IN DEER CREEK

Recent Rains Cause Much Damage to Wagon Road—Snow Fell in Higher Altitudes.

The storms which have soaked the farms the past week, caused a veritable flood in Deer Creek, where it approached the severity of a cloud burst, and carried away the blacksmith shop of the Cleghorn camp. Snow fell about one foot deep at the head of Major Evans and Mary Ellen Gulches. The riverlets that grew into raging torrents in many places filled the road with boulders and caused small land slides in many places, necessitating a lot of work to get the road in its former good condition.

HINDS PROPERTY TO BE DEVELOPED

The leasing company who holds a lease on the Dutchman mine this week let a contract to Charles Herron of Lehi to sink a shaft on the Ed. Hinds Volunteer group of claims south of the Dutchman and Whirlwind groups. It is held by mining experts that the Pacific-Dutchman fissure passes through the Volunteer claims and Messrs. Doolittle and Dilloway who hold a bond and lease on the ground propose to prove it.

SILVER DIPPER GETS RICH ORE

The parties who recently took a lease on the Silver Dipper mine have taken out three tons of ore samples of which, one of the leasers says shows assay values of 300 ounces of silver per ton and 65 per cent lead. Because of the difficulty of contending with the water they will probably run a tunnel 300 feet to get under the ore and drain off the water. Plans are being formulated to connect with the Mineral Flat power plant but a short distance away, and use two chip-ple drills to drive the tunnel.

POISONED WEED KILLED SHEEP.

John L. McKinney received a telephone message from his herders that thirty head of sheep had died from poisoning in one day. It appears that there is a wild bean on the reservation which is poisonous after a storm or else the sheep eat more freely when it is wet. Several others have lost sheep from the same cause.

ARROWHEAD TRAIL CHAPTER FORMED

This City Will Be On Transcontinental Highway With Thousands of Tourists Annually.

Three auto loads of boosters from San Bernardino County, California, struck American Fork at eleven o'clock Tuesday and held a meeting with citizens in the City Hall. The visitors outlined a plan for establishing what will be known as the Arrowhead Trail from Redland in California through the southern part of Nevada, Washington County up to Salt Lake City, a distance of a little over 800 miles. Most of the road is in fine condition now. One county in Nevada is bonding for \$100,000 to build the trail and other help is practically assured to make it a first-class automobile road the entire distance.

It was pointed out that to make it a great success there must be one big united organization from one end to the other. Mayor John Hunter, Postmaster Clarke, Dr. J. F. Noyes, Dr. Clark and Bishop J. R. Hindley made enthusiastic remarks, and a vote was taken unanimously favoring the organization of a local chapter of at least 25 members. James H. Clarke and J. Watt Storrs has the list.

As an inducement to form a chapter here, it was pointed out that with a good auto road through Utah to Southern California, it is probable 15,000 of transcontinental tourists would pass through this city annually and with our canyon, mines, lake and Mt. Timpanogos, we would get some of them to stop in this city while on their way.

PUBLIC LIBRARY AGAIN OPEN

The Public Library in American Fork re-opened on Monday of this week with Miss Margaret Blackhurst as librarian. Miss Blackhurst is well qualified for the work and will undoubtedly give excellent satisfaction in the position.

The general public is invited to visit the library and take advantage of its opportunities.

At the last meeting of the Civic Betterment League Committee the following committees were appointed and sustained: Library—E. A. Morgan, Alma Greenwood, Mrs. Lillie Adams, and Mrs. R. L. Asby. Advertising and Program—C. E. Young, Dr. P. M. Kelly and Earl Holmstead.

FLOCKS ARE TAKEN FROM CANYON RANGE

The four bands of sheep which have been grazing in American Fork Canyon during the summer were brought out this week. The flocks of Smith Bros., Healey Bros., and Clark Bros. all of Alpine were grazing on the National forest and that of Mrs. Ann Chipman was on patented mining claims in the neighborhood of Miller Hill. All are looking fine, particularly those of Mrs. Chipman.

CARL HANSEN DIES

Carl Hansen, who lived here some twenty-five years ago, owner of the Hotel Hamlet at Willwood, New Jersey, died at his hotel Thursday, Sept. 14, 1916, after an illness of several months. The Willwood Journal speaking of Mr. Hansen says: "Mr. Hansen was a man well liked, a good citizen, and a good neighbor. In addition to a wife in New Jersey, he leaves a mother and a half-sister who reside in Utah and a brother in California." His mother is Mrs. O. P. Olsen and his half-sister is Mrs. Leighton Cassidy, both of this city.

TWO GOOD EXAMPLES

One does not need to be wealthy to help make this a beautiful and attractive city. It will do one good to walk up the street from the Stake Tabernacle through weeds that leave only two feet of pavement to walk on and suddenly come to the home of Wm. Robinson with its beautiful flowers and green grass on both sides of the cement pavement.

Another place that gives pleasure to the passerby is the home of Justice William Hunter with its beautiful flowers and well kept lawn. There are many others but these are instances of what would make American Fork a beautiful city if emulated by the people generally.

KINDLY EXPRESSIONS

It is the unanimous expression of those who have been to the Fair, that you can do better right at home, if you want to purchase goods - Chipman's Coats have them all beat.

We buy direct from the manufacturers and can save you the Profits of the middle man.

We do not sell on Credit and consequently we can sell for less money than those who sell on time.

Chipman's Cash Prices Count

Our Children's and Misse's Coats are simply a Revelation to those who see them - Nifty - Beautiful - Durable.

Young Men who buy their suits from us are certainly Well Dressed.

Overcoats - - Rain Coats - - Mackinaw Coats

Chipman's Big Red Store

AMERICAN FORK, UTAH "THE BUSINESS CENTER"

HAS SILVER PLATE IN HIS LEG.

Mack, the 8-year-old son of Mr. and Mrs. W. S. Chipman was taken to a Salt Lake hospital Tuesday where his leg, which was broken in an automobile accident several weeks ago, was set for the fourth time. The doctors after placing him under an anesthetic cut away the flesh from the bone and then after setting the two ends together fastened them securely with a silver plate, one half by four inches, fastened to the bone with four silver screws. The little fellow was in much pain but is improving nicely.

DISTRICT SCHOOL TEACHERS WILL HOLD CONVENTION.

The Alpine District School Board held a meeting Tuesday evening and voted to hold the teachers' convention in Pleasant Grove next Saturday, Oct. 14. Orson Ryan of the Jordan school district will give a talk on the Boy Scout movement. Other leading educators will also be present.

A motion was also carried that students may enter the high school after the holidays by paying only one half of the regular tuition.

SHEEP ARE GIVEN SEMI-ANNUAL BATH.

During the past week 12,000 sheep belonging to Ruben Chipman, Milton Ingersoll, Thomas Singleton, Dell Singleton and Dick Adams of this city have been dipped on the reservation for ticks. They all used the same vat though some used a preparation of Black leaf Forty while others used Cresote. The sheep are reported in fine condition.

Mining Claim For Sale

Patented mining claim 100 by 2600 feet, lying over Mt. Baldy on the divide between American Fork and Little Cottonwood Canyons. It is patented along the ledge and contains apex of fissure vein. Silver, lead, copper ore ready to ship from old workings. Known on map as West Point No. 80. Liberal terms to responsible mining men. For information and full particulars apply to R. McGlynn, sole owner, 2411 Washington St., San Francisco, California. 7.2t

ETTERSON'S AT APOLLO HALL

One hundred and sixty-one tickets were sold for the Epperson Military

Band dance in the Apollo Hall last Friday night. The big crowd is an indication of the coming popularity of this center of amusement.
